DETAILED ACTION

Allowable Subject Matter

1. Claims 1-10 are allowed.
2. The following is an examiner's statement of reasons for allowance: none of the prior art of record is considered to teach, suggest or render obvious the invention of claims 1-10.

In particular of lithium secondary battery as recited in the claim wherein the battery comprises the claimed lithium-containing composite transition metal oxide positive electrode further comprising one or more metals of Groups IIA, IIIB, IVB, VB, VIB and lanthanide elements and compounds thereof, the one or more metals and compounds thereof is not less than 10 ppm and not more than 500 ppm based on the active material; a negative electrode; and a non aqueous electrolyte comprising at least one salt comprising LiPF₆ LiBF₄ LiAsF₆ LiSbF₆ and at least one imide salt as recited in claim 1.

Thus prior art of record, including the Y reference citations on the corresponding international search report, do not appear to have adequate teaching or suggestion of adding such materials at a ppm content between 10-500 ppm as recited in the instant claims. The combination of elements recited in claim 1 provides a battery having excellent characteristics such as high rate and low temperature characteristics and storage characteristics (pages 3, ll. 6-9; page 12, ll. 25-26; page 4, ll. 9-10).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
